

SIVAPRASATH SS

Full Stack Developer
Technical Lead

React.js | Node.js | Laravel

CONTACT

Phone: +91 7548814113

Email: sivaprasath.dev@gmail.com

Location: Coimbatore, Tamil Nadu, India

LinkedIn:
linkedin.com/in/sivaprasath-s-s

Portfolio: sp-p-lac.vercel.app

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Frontend: React.js, Bootstrap, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, Laravel, REST APIs, Microservices, Supabase

Databases: MongoDB, MySQL, Database Design, Query Optimization

DevOps & Tools: Docker, Linux, Apache, PM2, CI/CD, Git, GitHub, GitHub Actions, Postman

EDUCATION

Master of Computer Applications (MCA)

Dr. Mahalingam College of Engineering and Technology
2022 – 2024 - Percentage: 76%

Bachelor of Computer Science (B.Sc. Computer Science)

Sri Krishna College of Arts and Science
2019 – 2022 - Percentage: 76%

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
- Software Developer Internship Certificate - Nandha Infotech
- HackerRank Certification - Python Programming

PROFESSIONAL SUMMARY

Technical Lead and Full Stack Developer with over 2.5 years of experience designing, developing, and deploying scalable enterprise web applications across the MERN stack (React.js, Node.js, Express.js, MongoDB) and PHP/Laravel ecosystem. Experienced in mentoring developers and interns, conducting code reviews, establishing RESTful API standards, designing database schemas, and managing production deployments using Docker, Linux, Apache, PM2, and CI/CD pipelines.

PROFESSIONAL EXPERIENCE

NANDHA INFOTECH (Coimbatore, India | January 2024 – Present)

• Technical Lead (August 2026 – Present)

- Lead full-stack architecture, technical implementation, and end-to-end delivery of enterprise web applications.
- Guide and mentor developers and interns through technical implementation, code reviews, design patterns, and debugging.
- Drive database schema design, establish RESTful API standards, and guide technology selection for scalable and reliable applications.
- Assign and track development tasks across Agile/Scrum sprints, ensuring code quality, reusability, and timely delivery.
- Oversee production deployments, server maintenance, security, and troubleshooting using Docker, Linux, Apache, and PM2.
- Collaborate with stakeholders to translate business requirements into technical specifications and production-ready applications.

• Application Developer (June 2024 – July 2026)

- Engineered scalable web applications using React.js, Node.js, Express.js, PHP/Laravel, MongoDB, and MySQL, with a focus on application performance, scalability, and maintainability.
- Designed and implemented a multi-level referral tracking and commission distribution engine, optimizing calculation logic and transaction workflows.
- Built e-commerce modules including product catalogs, shopping cart, order management, and payment gateway API integrations, with reusable components and streamlined development workflows.
- Engineered inventory management modules with Role-Based Access Control (RBAC), strengthening application security and data accuracy.
- Containerized application microservices using Docker and configured automated CI/CD pipelines to streamline release and deployment workflows.

• Application Developer Intern (January 2024 – May 2024)

- Assisted in developing backend CRUD features and REST APIs using PHP, Laravel, MySQL, JavaScript, HTML5, CSS3, and Bootstrap.

KEY PROJECTS

- DevFlow — E-Commerce & Referral Engine:** Full-stack web application built with React.js, Node.js, Express.js, and MongoDB, featuring multi-level commission tracking, dynamic product catalogs, and payment gateway processing.
- Project Quantum — Inventory Management System:** Enterprise inventory tracking platform built with PHP/Laravel and MySQL, featuring Role-Based Access Control (RBAC), stock alert automation, and Docker containerization.
- Project Apex — Developer API Testing Platform:** Real-time API endpoint testing dashboard developed with React.js and Supabase, with visual metrics and GitHub Actions CI/CD pipeline validation.
